EDUCATION

Southeast Missouri State University

Bachelor of Science in Computer Science | Expected May 2027

Jefferson College

Associate of Arts, Cum Laude | May 2025

TECHNICAL SKILLS

Languages: Swift, Python, TypeScript, JavaScript, Java; SQL basics

iOS and web: SwiftUI, SwiftData, App Intents, XCTest, React, FastAPI, Node.js

Cloud and tools: Azure Functions, REST APIs, Git, GitHub, Xcode, Linux/Unix

Engineering: Input validation, local persistence, API contracts, unit testing, modular design

TECHNICAL EXPERIENCE

ATB Technologies

AI / Automation Intern | July-August 2026

- Built production workflow automation and data-migration tools using Node.js, Python, Azure Functions, and REST APIs.
- Applied testing, input validation, and reversible execution practices to support reliable software changes.
- Presented technical work to leadership and carried designs through review, deployment, documentation, and operational handoff.

ADDITIONAL PROFESSIONAL EXPERIENCE

Texas Roadhouse

Server / Front of House Trainer | 2023-2025; 2026

- Coordinated orders, handled transactions, resolved guest issues, and trained peers in a fast-paced service setting.

Century Casino - Beacon 53 Restaurant

Server / Bartender / Event Staff | August 2025-February 2026

- Supported fine dining, bartending, banquets, event setup, and guest service while coordinating across teams.

Saucy's Pizzeria

Delivery Driver | August 2022-June 2023

- Managed deliveries and processed transactions.

Walmart

Cashier | June 2021-August 2022

- Handled transactions and resolved customer-service complaints.

TECHNICAL PROJECTS

Vexr

Independent iOS project | SwiftUI, SwiftData, TypeScript, XCTest

- Built an iPhone strength-training app supporting routine import, workout sessions, set logging, notes, undo, and history review.
- Implemented local persistence with SwiftData and integrated App Intents for workout actions.
- Used structured API responses and tested core flows with XCTest, type checking, and contract tests.

CliniScan

HCBC Student Hackathon 2026 | React, FastAPI, Python

- Helped build a multimodal triage-support demo using a React frontend, FastAPI backend, and AI integrations.
- The prototype organizes symptom information into structured urgency guidance for educational and hackathon use.
- The team earned Third Place at the Harrison College of Business and Computing Student Hackathon 2026.

RPG Character Generator

Team course project | Python, openpyxl

- Collaborated on a program that generates fantasy characters using user input, randomized mechanics, and structured naming data.
- Used openpyxl to keep Excel-loaded naming data separate from generation logic.

Student Grade Management System

Team project | Java

- Contributed to a menu-driven application for adding, displaying, and searching grade records and calculating summary statistics.
- Implemented modular array-update and record-display methods, with validation of names, grades, and menu choices.

HONORS AND LEADERSHIP

Upsilon Pi Epsilon Honor Society

Member since 2026

- Inducted in recognition of academic achievement in computer science.

Emerging Leaders Program

January-April 2026

- Completed group sessions and a leadership retreat; peers voted Isaac "Most Natural Leader."

First Year Leadership Program

September-November 2025

- Participated in sessions focused on communication, collaboration, and campus leadership.
